Like many investors focused on sustainable and responsible investing (SRI), Trillium's environmental, social, and governance (ESG) criteria attempt to identify the companies best positioned to deliver strong long-term financial performance. Trillium's ESG research is focused on selecting companies that are meeting positive thresholds of performance for ESG issues, such as strong workplace practices, a demonstrated record of producing safe products for consumers protecting the environment, fair compensation for employees and executives, and respecting and upholding human rights. The following metrics attempt to quantify Trillium's exposure on key ESG issues. These may not reflect all of the criteria Trillium considers for inclusion in our portfolio.
